

# ***Strategies and Models for Community-Based Participatory Research***

**West Virginia School of Osteopathic Medicine  
Center for Rural and Community Health**

Dr. Drema Mace - Executive Director

Sally Hurst – Director of Outreach Programs, GCHA

Courtney Hereford – Research Coordinator

# Objectives

- Better understand community-based and participatory research and how it differs from traditional research.
- Learn more about the importance of community-building and engagement as preparatory and foundational to research.
- Learn how to build capacity and infrastructure for community-based research and engagement.

# Agenda

- Introduction
  - WVSOM's Center for Rural and Community Health
- Community-Based Participatory Research (CBPR)
- Rural Response Grant
  - Community building as preparatory to research
- Greenbrier County Health Alliance (GCHA)
  - Community engagement strategies, impacts & foundations for research
- Patient-Centered Outcomes Research (PCOR) & Next steps

# WVSOM - CRCH

## OUR MISSION

The WVSOM Center for Rural and Community Health (CRCH) supports the osteopathic medical education focus on team-based and patient-centered care and the integration of prevention and population health to improve quality and efficiency of health care delivery.

## OUR VISION

To develop program, collaborations, and resources that promote health, support research, and provide education and outreach to rural communities, students, providers, and practices across West Virginia.

CENTER FOR RURAL &  
COMMUNITY HEALTH

## OUR VALUES

**Teamwork**

**Dependability**

**Trust**

**Integrity**

**Respect**

**Collaboration**

**Community Service**

**Creativity**

**Innovation**

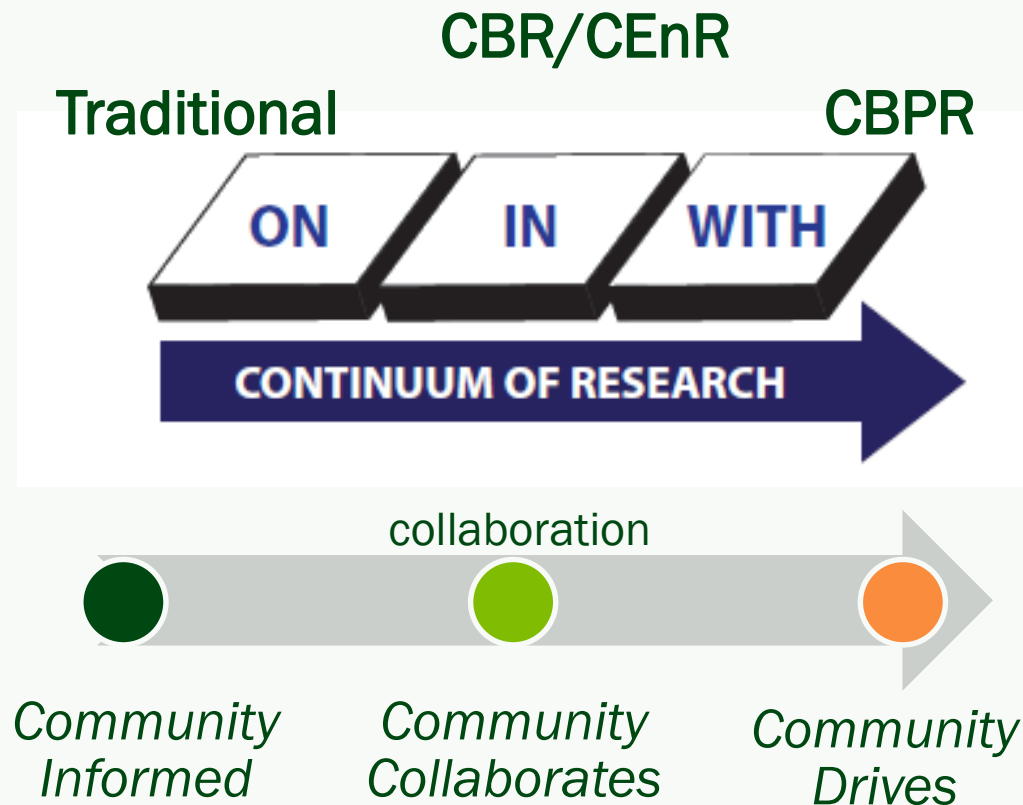

**Responsiveness**

**Commitment to Excellence**

# Community-Based Participatory Research (CBPR)

- A collaborative approach to research that equitably involves all partners in the research process, sharing decision-making and responsibility and recognizing the unique strengths and expertise that each contributes. CBPR begins with a research topic of importance to the community and aims to combine knowledge with action to achieve social change to improve health outcomes and eliminate health disparities. *(paraphrased: W.K. Kellogg Foundation/Israel et al, 1998)*
- A transformative research paradigm giving underserved communities a genuine voice to bridge the gap between science and practice through community engagement and social action to increase the likelihood of interventional and translational success. *(paraphrased: Wallerstein and Duran, 2010)*

# Community Research Continuum

Nothing about us without us.

# Research Approach

	Traditional Research	Community-engaged Research	
		Research with Community	Community-based Participatory Research
Research Objective	Researchers define the issues based on epidemiologic data and funding priorities	Community participates in defining research questions that are relevant to their local needs and experience	Community identifies research issues or works with researchers to define and prioritize research goals (increased focus on community strengths) and are involve as part of the funding process
Study Design	Researchers base design on scientific rigor and feasibility	Researchers work with community to develop culturally appropriate and feasible study design	Researchers communicate the need for specific study design approaches and work closely with the community to design acceptable approaches that will be feasible and provide quality information including type (qualitative or quantitative methods)
Recruitment and Retention	Based on scientific issues and “best guesses” regarding how to best reach community members	Research consults community representatives on strategies to recruit and retain participants	Community representatives provide guidance on best way to reach intended study participants and keep them involved in the study
Instrument Design	Instruments are adopted and adapted from other studies based on psychometric analytic measures	Community members involved in some aspects of data collection	Community members contribute to instrument design including development and pilot testing prior to beginning formal research, increasing likelihood of validity and reliability

# Research Approach (continued)

	Traditional Research	Community-engaged Research	
		Research with Community	Community-based Participatory Research
Data Collection	Conducted by academic researchers who have no connection to the community	Community members involved in some aspects of data collection	Conducted BY members of the community, to the extent possible based on available skill sets. Researchers and community members work together to help build community capacity
Analysis and Interpretation	Researchers “own” the data, control the analytic process, resources, and data interpretation	Researchers retain primary “ownership” of the data and analysis, but rely on community members to assist with interpretation	Data ownership is shared. Community and research partners work together to interpret results
Dissemination	Results published in peer-reviewed academic journals and presented at professional conferences by researchers	Results jointly disseminated in community and academic venues and may contribute to publications and presentations	Community member help researchers to decide appropriate venues and mediums to disseminate results in a timely manner, and are included as co-authors

# Principles of CBPR

**Values** = TRUST, respect, self-determination, sovereignty, empowerment, reciprocity

(Principles should also be partnership-defined!)

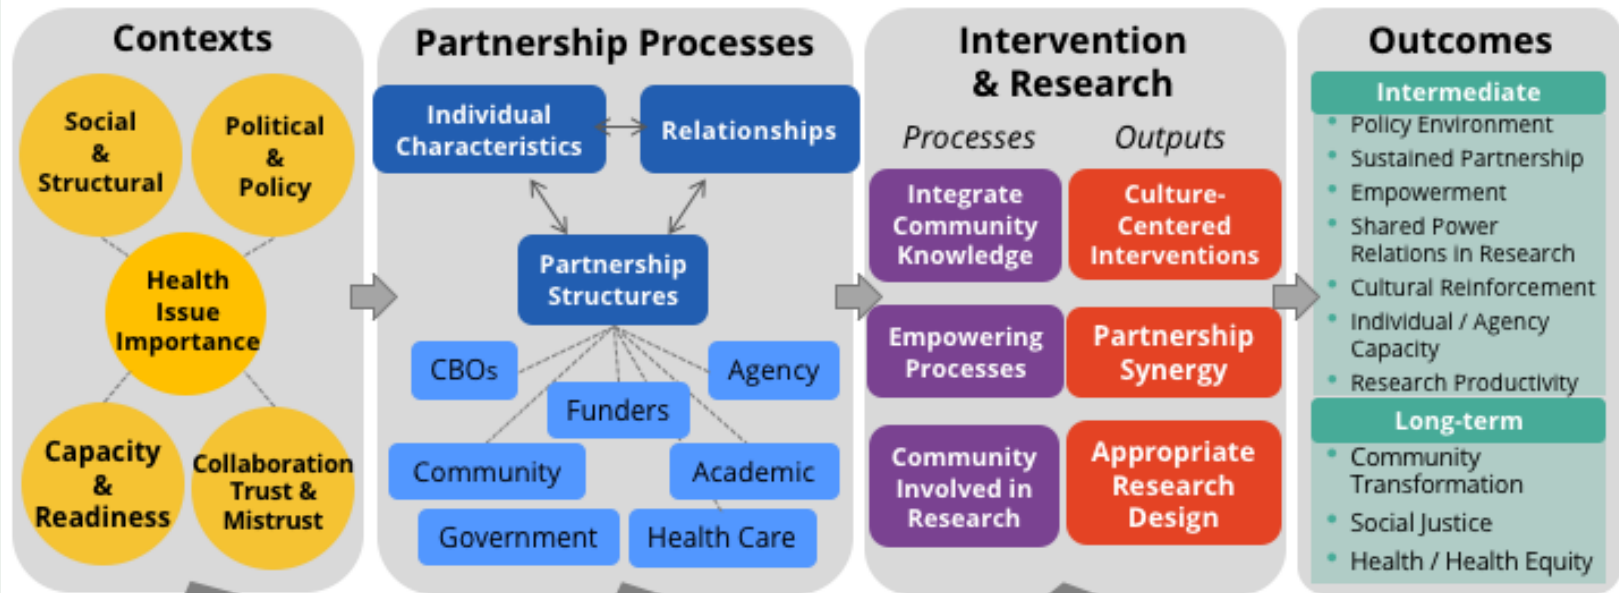

# Principles of CBPR

# CBPR Conceptual Model (2017)

## CBPR Conceptual Model

Adapted from Wallerstein et al, 2008 & Wallerstein and Duran, 2010, <https://cpr.unm.edu/research-projects/cbpr-project/cbpr-model.html>

Visual from amoshealth.org 2017

# CBPR – so what?

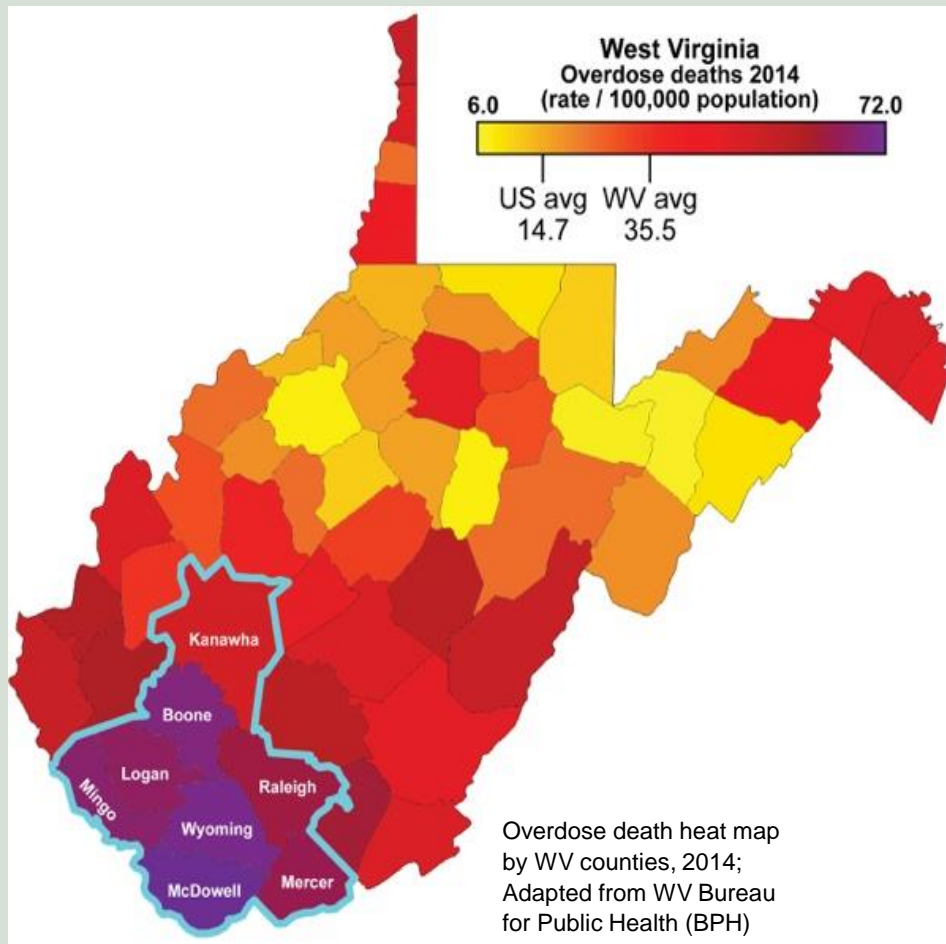

- Pros

- Subjectivity!
- Community priority
- Research relevance, application,
- Enrich quality, validity, sensitivity
- Diverse expertise for complex problems
- Utilize existing systems and resources
- Overcome distrust, bridge divides
- Enhance agency, capacity, health & wellbeing

- Cons

- Subjectivity!
- Community self-defined
- IRB issues
- Macro approach & Global outcomes
- Deficient assessment & evaluation
- Accountability
- Ends vs. means
- Time!

# Example - Opioid Related NIH/NIDA Partnership Grant

**Table 1. Eight WV Counties**

Southern WV County	CDC Rank	2014 Pop.
McDowell	2	20,448
Mingo	7	25,716
Wyoming	16	22,598
Raleigh	18	78,241
Logan	20	35,348
Boone	22	23,714
Mercer	147	61,785
Kanawha	209	190,223

# Engage the Community - Community Forums

# Organize the Community - Community Workgroups

# Trust Community Members' Ideas

**FREE**

**Family Fun Day**

Sponsored by:

- Amazing Grace Fellowship
- Aversons Auto Repair
- Mountaineer Drug Pharmacy
- Water Valve Services
- Brent Wells
- Community Connections

# Create Sustainable Programs

# Boone Opioid Network

*Transformed People...*

**Boone Recovery Coach Academy**

by David Sanders

**DATE AND TIME**

Mon, Mar 26, 2018, 8:30 AM –  
Fri, Mar 30, 2018, 4:30 PM EDT

**LOCATION**

Madison Baptist Church  
426 2nd St  
Madison, WV 25130

LOGANBANNER.COM  
**Recovery Roads: Woman celebrates 18 months clean**

**BLACK BALLOON DAY 2018**  
*March 6, 2016*

Raise Awareness  
Reduce Stigma  
Families are Affected Too  
Entire Communities Affected

*2nd Annual BLACKBALLOONDAY*  
*Raising Awareness*  
*to the effects of*  
**DRUG ADDICTION**

#BooneHEARTS

## ***Community Engagement Creates Potential for Community Research***

<http://www.greenbriercountyhealthalliance.org/>

# Partnership for Community Engagement

- West Virginia School of Osteopathic Medicine/Center for Rural and Community Health
- WVCTSI Community Engagement and Outreach Core
- Greenbrier County local service providers
- Grassroots community leaders

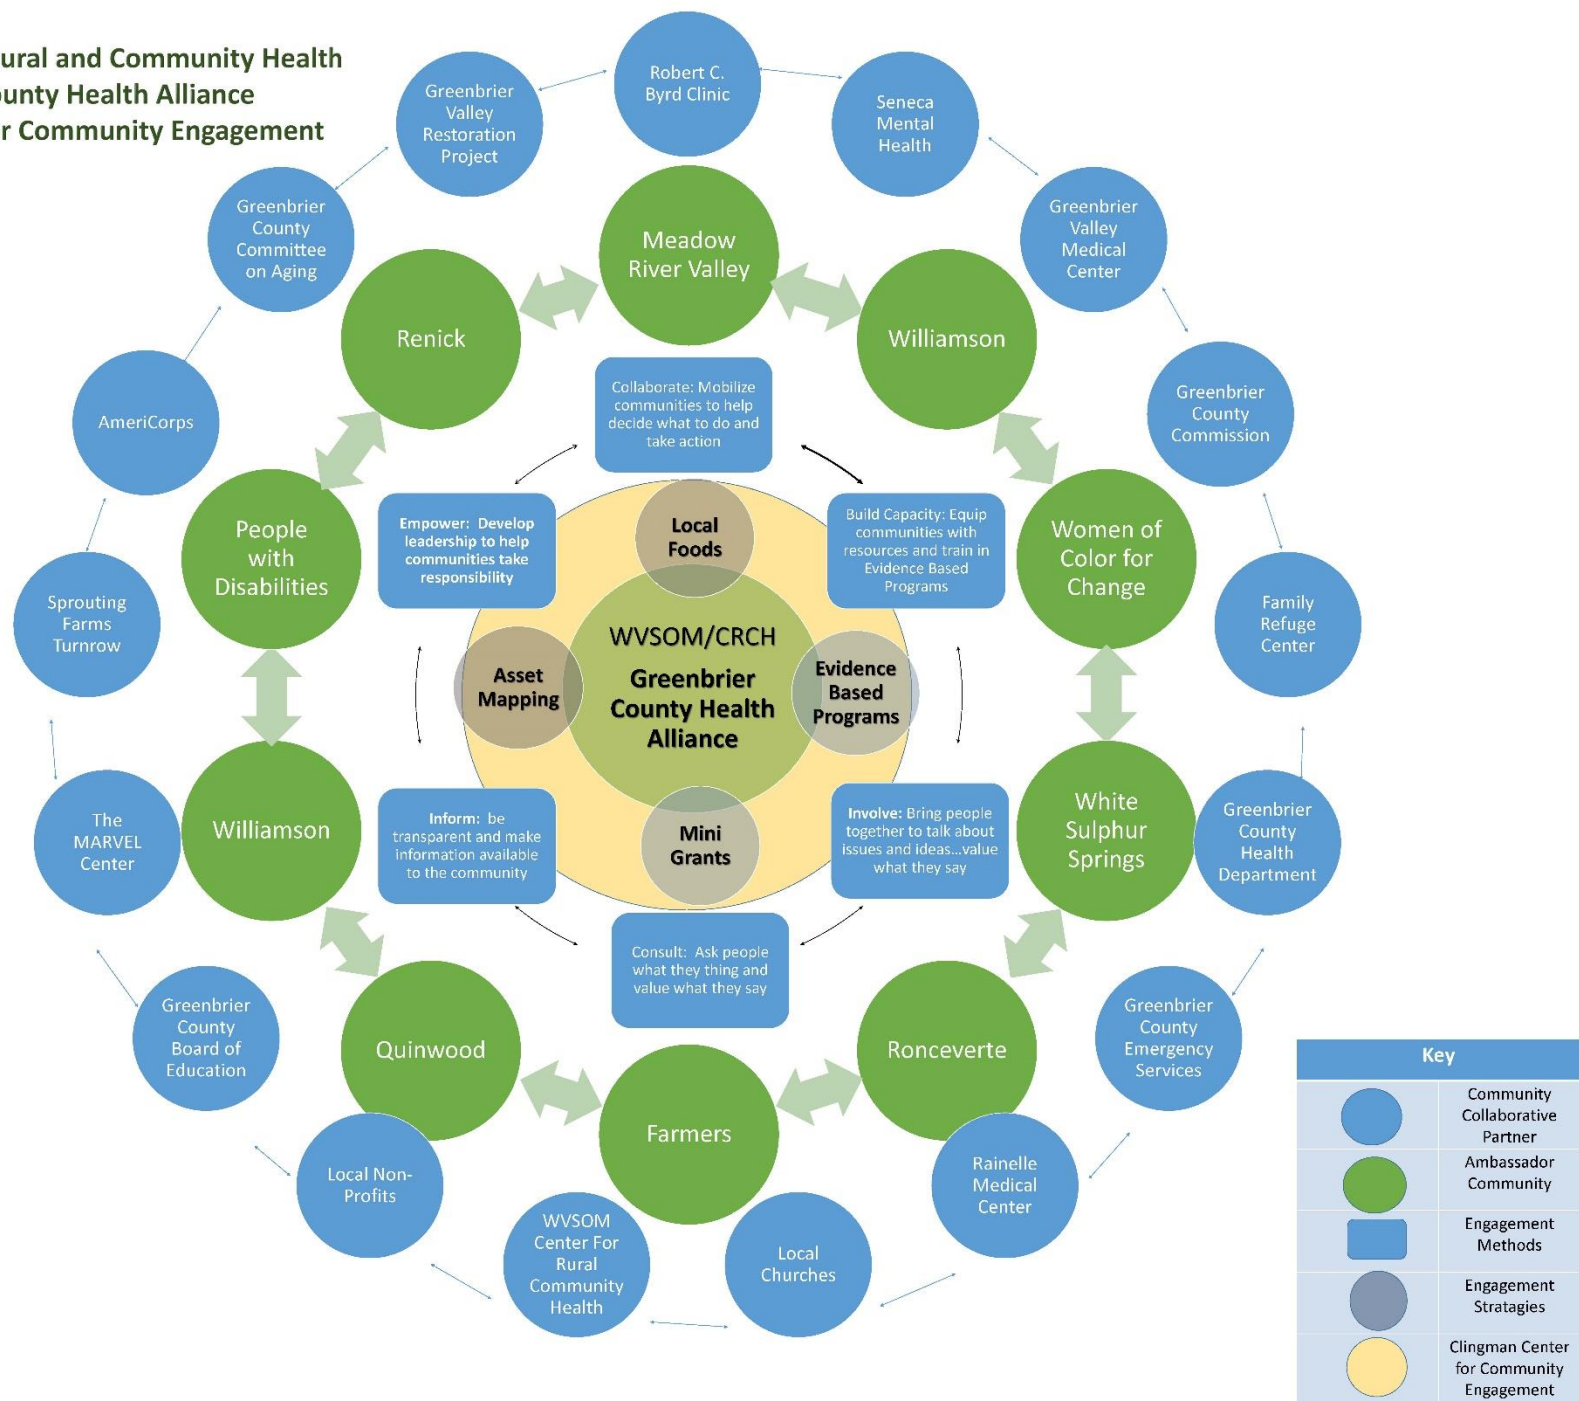

# **Maintain Focus on 4 Community Engagement Strategies**

- Community Ambassadors
- Mapping of Assets
- Evidence Based Programs
- Local Foods to Meet Local Need

# What has happened...?

**WVSOM Center for Rural and Community Health**  
**Greenbrier County Health Alliance**  
**Clingman Center For Community Engagement**

# Partnerships have created trust...

# GCHA Engagement Survey

(summer 2018)

Survey Participants

## Participation in GCHA contributed to: (% Agree or Strongly Agree)

## Participation in GCHA contributed to: (% Agree or Strongly Agree)

## GCHA: (% Agree or Strongly Agree)

# Engagement process results

- GCHA was open and accessible. 98.0% of participants surveyed.
- GCHA was respectful and fair. 98.0%
- GCHA helped develop connections between existing resources. 98.0%
- GCHA created new resources and services. 96.1%
- GCHA provided information that was helpful, relevant, and understandable. 96.1%
- GCHA made positive change happen. 96.1%
- GCHA encouraged diverse and inclusive participation. 96.0%
- GCHA encouraged a sense of empowerment in participants. 94.1%
- GCHA helped build trust and respect among participants and partners. 94.1%
- GCHA improved collaboration and networking across the county. 94.1%
- GCHA valued and incorporated participant input and feedback into processes. 94.1%
- GCHA created and strengthened partnerships. 92.0%

# Building skills, confidence, and capacity

*“I have seen our community come together in many ways because of the influence of GCHA. I've also seen growth and improvements in individuals as they've learned ways of self-managing their health. On a personal level, my husband has lost weight and gained control of his diabetes with the support and information made available through the GCHA resources and teachings. We will be forever grateful to GCHA for the impact seen.”*

# Interest in research

Questions:

- What data to collect, when to collect it, tools for collection?
- How to schedule time and resources for data collection?
- How to reflect on what's working and not working, and use information for further planning?
- What are my health options?
- How can we address health issues?

# **GCHA Potential for Research**

- Facilitate community-focused and action-oriented discussions on health disparities, priorities, research, and solutions
- Educate community members, researchers, and healthcare stakeholders on community and patient-centered research process
- Develop a community research network with research capacity and tools to support research in Greenbrier Valley to adapt and disseminate throughout WV and Appalachia.

# **Clingman Community Engagement Center:**

## **Engaging Patients and Providers in PCOR Training & Partnership**

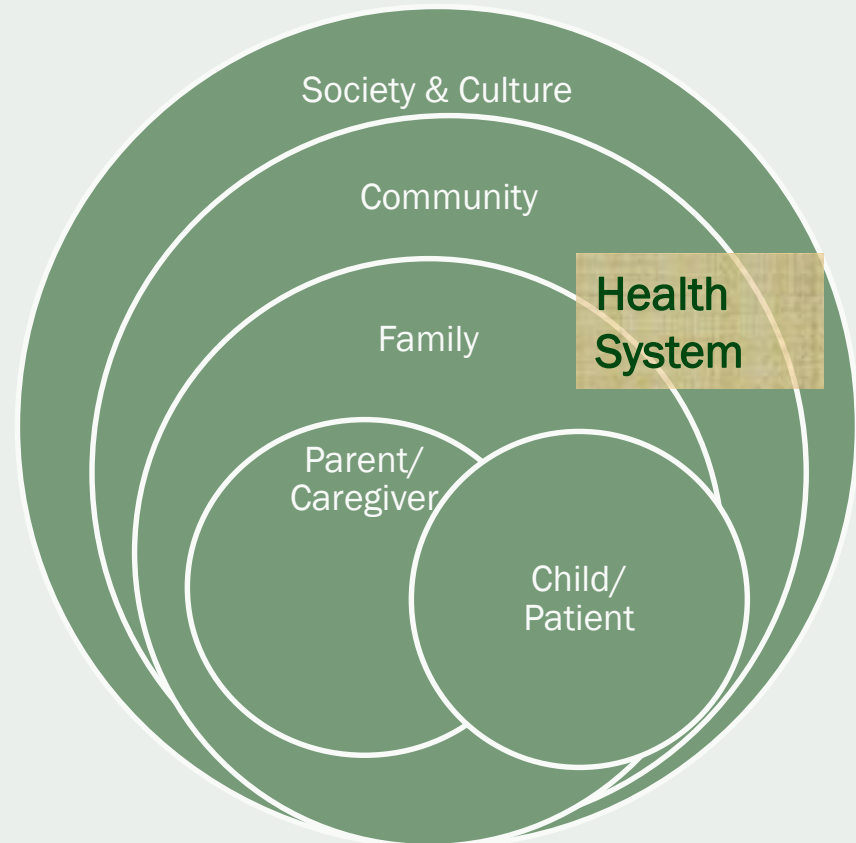

- Eugene Washington PCORI Engagement Award: Capacity Building – build community capacity & infrastructure for PCOR
- Dynamic hub for community-based initiatives and programming, evidence-based training, workforce development, culinary outreach, local foods justice.
- Strengthen trust, rapport, partnership, opportunity
- Build knowledge, competencies, abilities of stakeholders as partners with meaningful roles in research
- Discussion, priority, and agenda setting, training, skill-building, workshops, partnership and collaboration, advisory & evaluation panels, shared dissemination & sustainability plans

# Perspectives

## Health System

## Patient

*Health happens outside of the treatment setting.*

# Patient-Centered Outcomes Research (PCOR)

- Helps people and caregivers communicate and make informed health care decisions, allowing voices to be heard in assessing the value of health care options
- Actively engages patients and users of research in all steps of research process to meet stated goals and improve health outcomes
- Evaluates outcomes that are most important to patients
- Addresses implementation of research findings in clinical care environments
- Subset of CER
- **Comparative Effectiveness Research (CER):**
  - The generation and synthesis of evidence that **compares** the benefits and harms of alternative methods to prevent, diagnose, treat, and monitor a clinical condition or to improve the delivery of care. The purpose of CER is to assist consumers, clinicians, purchasers, and policy makers to make informed decisions that will improve health care at individual and population levels (IOM/PCORI)

**If we asked better questions, there would be better evidence.**

# PCOR Engagement

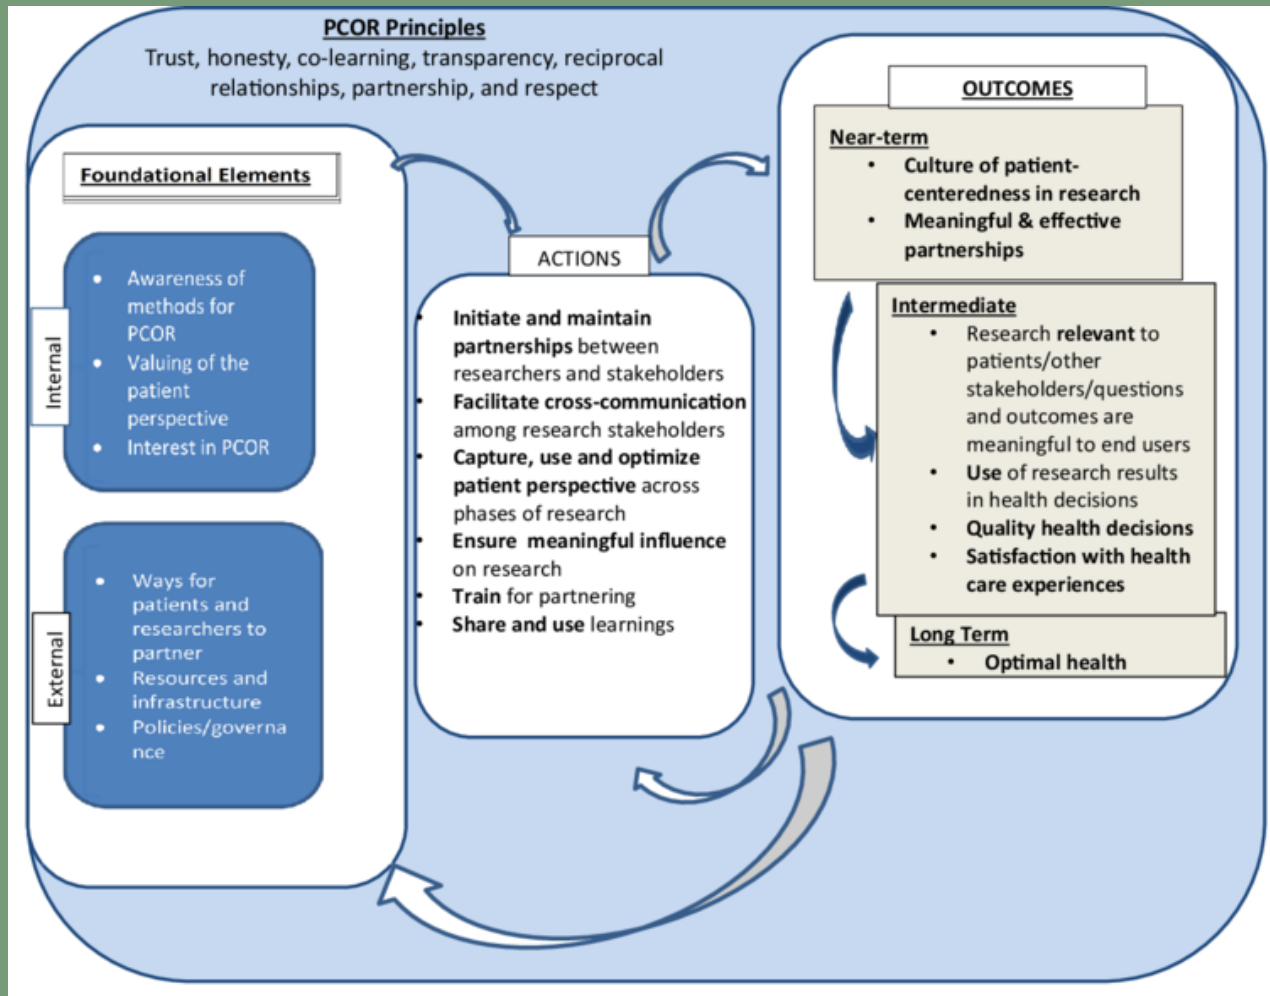

- Stakeholders
  - **Patients & clinicians**
  - Caregivers, healthcare purchasers, payers, policymakers
  - Reps from hospitals, health systems, industry, advocacy and training, orgs
- Process priorities
  - Knowledge, experience, judgment, and values are desirable
  - Values: trust, respect, fairness
  - Outcomes: shared understanding & decision-making that is viewed as actionable and credible to all
- Approaches
  - **Research co-investigators & team partners**
  - **Advisory boards & Community experts**
  - Surveys, interviews, opinion polls

# PCOR Study Engagement

- Understanding patient/stakeholder needs
  - Share personal & pro perspectives
  - Best approaches for addressing needs and priorities
- Research topics & questions
- Interventions
- Outcomes & measurement
- Recruitment & retention
  - Finding & recruiting participants
  - Training research staff
- Data collection
  - interviews, focus groups, surveys, tracking
- Data analysis and review
- Dissemination & application
  - Co-presenting, manuscript and newsletters, determining outlets, media interviews, meeting with officials

# PCOR Framework

# Limitations

- Lack shared understanding of effective stakeholder engagement in research
- Limited evidence base, data and evaluation
- Extensive training needs for all partners
- Partner selection bias/diversity & inclusivity
- Budget & cost concerns for project
- Time!
- Subjectivity

# Findings

- Enhanced patient-centeredness/relevance of study processes and outcomes.
  - Reiterated significance of research being pursued.
  - Increased sensitivity and fit of interventions, materials, data collection
  - Decreased participation burden
  - Outcomes and measures of importance to participants
- Enhanced study design, conduct, and/or efficiency.
  - Recruitment, retention, follow-up, data collection
  - Expanded audience
  - Improved communication
  - Increased credibility of findings

# **Community Engagement Exhibit**

**2019 WVCTSI Annual Meeting  
optional visit to Montwell Commons**

**Tour the Clingman Center Barn**

**April 3**

**1:00 - 3:00**

**We hope you can join us!**
